
Fertility research

Posted by LesleyH - 2009/02/02 13:21

Hi all, I am posting to ask for your help.....

My name is Lesley Halliday. I am an associate lecturer and doctoral researcher in the Faculty of Nursing & Midwifery at the University of Sydney.

I am interested in learning more about fertility and motherhood in females who have been treated for any type of haematological malignancy as it has become apparent that information, services and management are often lacking in this important aspect of care.

I am seeking women who are: aged 25-39 years; have been diagnosed with any type of haematological cancer within the past 10 years, and are at least 1 year post diagnosis; and currently live in Australia and are fluent English speakers.

I would like to talk to you (at a time and location convenient for you) about your cancer experience, in particular in relation to your knowledge, thoughts and feelings about fertility or motherhood.

This research has received ethics approval from the Human Research Ethics Committee at the University of Sydney, and is being supervised by Associate Professor Maureen Boughton, a registered nurse and midwife and women's health researcher, and Associate Professor Ian Kerridge, a haematologist from Westmead Hospital.

If you would like to know more, or wish to participate, please contact me, in confidence, on 02 9351 0618 or email l.halliday@usyd.edu.au for more information.

Please pass on the word about this important and much needed research to anyone you know who may be interested.

Thanks for reading and I hope to hear from you soon :unsure:

Hi :)

Firstly, just wanted to say a huge thank you to all the women who have offered their help for this research- its really really appreciated.

Secondly, I am still seeking women to share their experiences, so please contact me if you are interested, or have been effected in some way.

Thank you so much
Lesley
